Why do people want raw milk?

Farm fresh raw milk has been shown to be more nutritious than pasteurized milk. It’s delicious!

What did FDA say to FTCLDF’s court challenge of the interstate commerce ban on raw milk for humans?

- “There is no absolute right to consume or feed children any particular food.”
- FDA even dared to deny that people have a “fundamental right to their own bodily and physical health, which includes what foods they do and do not choose to consume for themselves and their families.”
